Natbib

```
\usepackage[round,sort&compress,authoryear]{natbib}  
\bibliographystyle{kluwer}  
%\usepackage[square,sort&compress,numbers]{natbib}  
%\bibliographystyle{ieeetr}
```

- **round**: (default) for round parentheses;
- **square**: for square brackets;
- **curly**: for curly braces;
- **angle**: for angle brackets;
- **colon**: (default) to separate multiple citations with colons;
- **comma**: to use commas as separators;
- **authoryear**: (default) for author-year citations;
- **numbers**: for numerical citations;
- **super**: for superscripted numerical citations, as in Nature;
- **sort**: orders multiple citations into the sequence in which they appear in the list of references;

Natbib

```

\usepackage[round,sort&compress,authoryear]{natbib}
\bibliographystyle{kluwer}
%\usepackage[square,sort&compress,numbers]{natbib}
%\bibliographystyle{ieeetr}

```

- **sort&compress**: as sort but in addition multiple numerical citations are compressed if possible (as 3-6, 15);
- **longnamesfirst**: makes the first citation of any reference the equivalent of the starred variant (full author list) and subsequent citations normal (abbreviated list);
- **sectionbib**: redefines `\thebibliography` to `issue \section*` instead of `\chapter*`; valid only for classes with a `\chapter` command; to be used with the **chapterbib** package;
- **nonamebreak**: keeps all the authors' names in a citation on one line; causes overfull hboxes but helps with some hyperref problems.

Natbib

`\citet` and `\citep` for textual and parenthetical citations.

`\citet*` and `\citep*` that print the full author list, and not just the abbreviated one.

Zotero [zoh-TAIR-oh] is a free, easy-to-use tool to help you **collect, organize, cite, and share** your research sources.

Download Now

Available for Mac, Windows, and Linux

Collect Organize Cite Sync Collaborate

Grab your research with a single click.

A personal research assistant.

Zotero is the only research tool that automatically senses content in your web browser, allowing you to add it to your personal library with a single click. Whether you're searching for a preprint on arXiv.org, a journal article from JSTOR, a news story from the *New York Times*, or a book from your university library catalog, Zotero has you covered with support for thousands of sites.

Store anything.

Zotero collects all your research in a single, searchable interface. You can add PDFs, images, audio and video files, snapshots of web pages, and really anything else. Zotero automatically indexes the full-text
